George,

Sorry for the late reply: I wanted to respond to your inquiry after we receive and review the first semi-annual 2016 groundwater monitoring report so that we can provide a firm answer. Today we received the final report. Based on review of the report, we agree that this case may be closed since the maximum benzene concentration during the last monitoring event in August was 0.41 ppb. Any question please let me know.

Thanks,

Wei Liu, Ph.D., P.G.

Wei and Chris, Good afternoon, just checking, have you had enough time to review this case ? Are we going to close or maintain denial ?
